

## CheckJet Reduces QuickBooks® Check Costs and Improves Productivity

CheckJet frees QuickBooks users from the expense and security vulnerabilities of maintaining supplies of preprinted check stock. Designed to be simple, CheckJet quickly installs between your printer and your company's network. It arrives ready to print with your custom check designs preinstalled by TypeHaus.

Responding to requests from accountants and bookkeepers, TypeHaus has introduced CheckJet™. CheckJet eliminates the need for preprinted check stock, reducing costs, simplifying supplies management, and enabling the use of a wide range of check security features.

### productivity

CheckJet prints the check form for each bank account, eliminating the need to swap trays of preprinted checks in and out of your check printer. When it's time to print checks, simply load blank security check stock and print checks directly from QuickBooks. CheckJet takes care of printing the proper bank account routing numbers and other account information. As an option, CheckJet can securely automate the tedious process of hand signing checks when using either preprinted or blank check stock. Busy executives have the option of authorizing check signing by remotely entering a personal identification number.

### security

CheckJet maintains all account and other sensitive information in a removable memory card. Simply removing this card to a secure location prevents unauthorized check printing without affecting the printing of other documents.

### simplicity

CheckJet attaches externally to your printer, requiring no printer modifications and no network configuration. It automatically adopts your printer's configuration settings.

USA Customer Service

USA Design

USA Assembly

Global and USA sourced components.

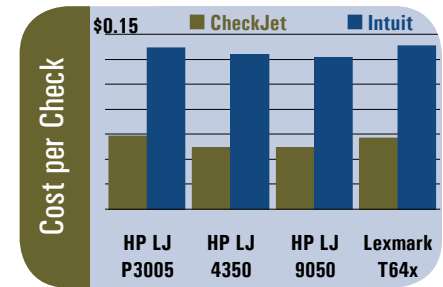

## Use Lower Cost, Higher Security Check Paper

## features & benefits

- Per-check cost savings from 55% to 60% depending upon printer model
- Wide range of security stock available for significantly less than preprinted checks
- MICR toner available for most major laser printers

Check printing uses magnetically sensitive MICR toner for efficient processing by ultra high speed check sorting machines. Using MICR toner is as simple as replacing the printer's existing toner cartridge with a similar cartridge containing MICR toner. TypeHaus supplies cost effective MICR toner cartridges for most major laser printers.

"...estimated gross check losses represent an average *annual increase* of approximately 5 percent..." Board of Governors, Federal Reserve System, April 2007 Report to Congress. CheckJet reduces fraud opportunity by facilitating the use of high security check stock while storing sensitive information away from client PCs.

- Eliminate the need to manage and protect inventories of preprinted checks
- Incorporate advanced security features into check runs
- Consolidate check printing onto common paper supply
- Compatible with most network attached laser printers
- Fast and easy installation
- Works with all versions of QuickBooks

## about us

TypeHaus designs and manufactures printer hardware devices and software solutions to support enterprise applications requiring enhanced printer resources. TypeHaus is recognized by Fortune 500 companies for its expertise in print stream control, line of high-quality products, and unparalleled pre-sales and post-sales customer support. TypeHaus solutions enable current and legacy systems to take advantage of the latest printing technologies. We are a stocking supplier of check stock and MICR toner. We have been providing solutions for critical document printing since 1992.

## warranty & support

All TypeHaus hardware products come with a one-year limited warranty against defects in materials and workmanship from the original date of purchase. Warranty upgrades available.

We always strive to provide a high level of customer service. Our US based service team creates a dependable relationship focused on delivering quality technical support. TypeHaus offers phone support during our regular business hours of 8:00 am to 5:00 pm Pacific Time Monday through Friday.
