

# Installation & Test Guide

For HP LaserJets and MFPs with 100 Pin DIMM (Reversed)

Extending the Resources and Abilities of Your Printer

1

Use the power switch to turn off the printer and then unplug the power cord from the printer.

2

Unplug all remaining cables and cords from the printer.

3

Carefully open the DIMM access door located on the left side of the printer.

4

Remove the DIMM from the anti-static bag it came in, grasping the DIMM along the top edge away from the gold contacts.

5

The DIMM has a notch cut in the edge between some of the gold contacts. Orient the DIMM so this notch aligns with the bump in the printer's connector and insert the DIMM into the connector.

6

Press the DIMM body in until the metal retaining pins click.

7

Close the DIMM access door, reconnect all cables and cords, then turn the power switch on.

## Congratulations!

You are now ready to print the complete set of PCL5 fonts using your printer. To test your PCL5 Complete Font Set, simply use your printer's control panel to print a PCL Font List. On most printer models, select "Information" and then "Print PCL Font List".

See the reverse side of this sheet for an example of the first page of a PCL Font List showing the PCL5 Complete Font Set fonts. The PCL Font List may vary a little between different printer models, but the PCL5 Complete Font Set fonts will be shown somewhere in the list.
